

# SASAN ZARE

## FULL STACK DEVELOPER

Maybe my real birthday was when I married the computer and surrendered to it. I believe that with a strong understanding of computer logic, they can solve any problem if we give them the right instructions. I focused on programming. I am familiar with databases.

Shiraz, Iran (open to relocation)

## Education

2018

### Bachelor Computer engineering

[Shiraz University](#)

## Expertise

- UI/UX
- Web designer
- Web programmer
- Full stack developer
- Server manager
- Machine learning

## Language

Persian

English

## Experience

### 2017 - 2018

Codebox.ir | Iran, Shiraz, Ordibehesht St, Shiraz Tower IT

#### Web designer

I managed the front-end development team and focused on various websites and projects of the large Codebox portfolio, often optimizing websites and adding new features to projects. In the company, my colleagues called me the optimizer.

### 2018 - 2020

Codebox.ir | Iran, Shiraz, Ordibehesht St, Shiraz Tower IT

#### Web programmer

My focus was on backend and database. During this time, I gained a lot of experience under the supervision of my manager. I developed various projects with the most common server-side languages. My biggest experience at that time was optimizing and backing up databases. It was also pleasant to develop projects with the Codebox exclusive framework.

### 2020 - 2022

Codebox.ir | Iran, Shiraz

#### Full stack developer

During this time, I was in charge of the complete management and development of projects from database design to UI design. My focus was on software architecture and I tried to choose the most suitable architecture, language, stack and structure for each project. I was responsible for optimizing the project from the back-end and front-end sides, and I tried to do it in the best way.
